MS Windows MS OS/2 MS OS/2 PM dBASE

## Look At This!

Add dBASE III Plus and dBASE IV compatible I/O to your MS Windows and OS/2 applications with PowerLibW! Write new applications that use your existing dBASE database. And since PowerLibW is a Dynamic Link Library (DLL) and DBMS Server, you can write your application using standard MS Windows and MS OS/2 Languages in addition to 4GL development tools like Actor, Bridge, KnowledgePro Windows, and SQLWindows. You can use PowerLibW with any MS Windows or MS OS/2 application or language that can access a DLL! PowerLibW provides the power and control you need to use your dBASE databases in the MS Windows and MS OS/2 environments.

### PowerLibW
